

COORDINATOR CHECKLIST

When you are about to approach a patient, please consider bringing the followings items:

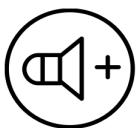

Reading Glasses

Often in hospital settings, admitted patients may not have their reading glasses.

Bring a variety of prescriptions
(-1, -3, -5)

Hearing Device

To assist the hearing impaired, bring the following devices:

Amplifiers

Listening system

PI Invitation

PI invitation to the study with photo of team.

A personal connection to the research team is the best practice to developing and maintaining trust.

Infographics

Info-graphics help explain clinical trial research terminology in a health literate manner.

NIMICT provides info-graphics on:

- o Clinical trial basics
- o Neurological terminology

Supplies

Remember to bring extra pens and informed consent documents!

Remember the importance of culture and language of the patient

Functional Status/Outcome	X	X	X	X (telephone)	X	X (telephone)

Contact Form - Research Team

Provide a Contact Form to patients and their family, friends, and caregivers

Neurologist

A neurologist is a doctor who specializes in brain and nervous system diseases. At most hospitals, neurologists care for people who have had strokes. Nurses, occupational therapists, physical therapists, and speech and language pathologists work with doctors to help care for persons with stroke. This program will last for 4 years, during this time the neurologist will monitor your treatment and recovery from your stroke.

- Your Doctor's name is: _____
- Your clinic number is: _____

Nurse or Coordinator

Each hospital helping with this program has at least one person assigned to help organize the program for the medical center. This person is called the research nurse or program coordinator. This person helps schedule all the necessary tests and procedures and gathers the information to report to the main study center. The coordinator tends to be the main link between the patient, the neurologist, the scheduling system, other doctors and the main study center or hospital.

- Your Program Coordinator's name is: _____
- S/he can be reached at: _____

Coordinator

At different times during this program, information will be collected by someone other than the Program Coordinator. This person will not know anything about you except for your contact information and the fact that you are a part of the program. This person is called an interviewer. An interviewer is used to ensure that all of the collected information is correct.

- Your Program Coordinator's name is: _____
- S/he can be reached at: _____
